

New Jersey Commuters

Floyd Hall is forcing a service shutdown!

Floyd Hall is the owner of the New Jersey Jackals. He is also on Amtrak's Board of Directors. He has no experience operating a railroad. He was appointed by the White House because he is a big supporter of the President and he supports the Bush agenda to destroy publicly owned rail transportation in America.

Our members construct and maintain the railroad track, bridges, buildings and overhead catenary system for Amtrak's facilities between Boston and Washington DC. We perform tough, hard, dangerous work in all weather conditions to ensure that this vital public service functions for the citizens along the Northeast corridor.

Yet, our Union has now entered its seventh year without a collective bargaining agreement on Amtrak. Floyd Hall and the other members of Amtrak's Board of Directors are demanding steep cuts in our benefits, reductions in our income and replacing our jobs with outsourcing. They have made reaching an agreement impossible. Their position will eventually force us to go on strike and shut down the Northeast Corridor and all of the commuter trains that depend upon it. We have offered to arbitrate a new agreement without a strike and Amtrak has refused this offer! Floyd Hall could direct Amtrak to do the right thing but won't.

Floyd Hall, you have the ability to resolve this problem, but you have chosen to abandon your responsibilities to the citizens who depend upon rail passenger service.
